## Professional Experience

**CBS News | Senior Investigative Data Reporter, Managing Editor | New York, NY | Jun 2023 – Present**

I pitch, develop, and assist with data-driven stories for a large television and online newsroom. The CBS Data Team collaborates with all parts of the CBS network, from the Evening News to 60 Minutes to its owned-and-operated stations. In addition to my own journalistic output, I function as a deputy editor, with three direct reports and responsibilities across the rest of the team.

**ProPublica | Data Reporter, Freelance Contributor | New York, NY | Jul 2023 – Dec 2023**

I designed and executed a data analysis for a long-term investigation. It required quickly getting up to speed on a complex topic, negotiating records requests and working closely with reporters, researchers, and editors.

**City University of New York | Adjunct Lecturer | New York, NY | Sep 2022 – May 2023**

I designed and taught a course on data reporting and visualization.

**BuzzFeed News | Data Reporter, Investigations | New York, NY | Jan 2018 – Jul 2022**

I reported data-driven stories as part of the investigations team. I also collaborated with newsroom colleagues on data projects including the FinCEN Files, finalist for the Pulitzer Prize.

**Reveal/Center for Investigative Reporting | Data Journalist | Emeryville, CA | Nov 2015 – Dec 2017**

I found and analyzed data for investigations. I built interactive applications with maps and charts. My interactive work won two national awards in 2017.

**NBC Bay Area | Digital Editor, Investigations | San Jose, CA | Jan 2014 – Nov 2015**

**KBIA Public Radio | Content Director | Columbia, MO | Jul 2011 – Dec 2013**

## Education

**Bachelor of Arts | Reed College, Portland, OR | 2008**

## Technical Skills Summary

Languages and libraries: Python, Pandas, Matplotlib, JavaScript, ObservableJS, SQL, Bash/Zsh.  
GIS: QGIS, ArcGIS, GeoPandas, GDAL.
